# F-Series Pressure Switches for Hazardous Locations 

RELIABLE IN -

- Offshore oil rigs
- Chemical and petrochemical plants
- Pulp and paper mills
- Engines, turbines and compressors
- Pipelines
- Water and wastewater treatment plants
- Machinery and equipment where compact size is important
Ashcroft Inc. supplies highly reliable Ashcroft ${ }^{( }$ switches and controls for industrial and process applications. We begin with rocksolid designs, matching the most appropriate technology with the safety and reliability requirements of the applications. The materials of construction are specified to exacting standards, and product is built to last in the toughest applications. Our modern, responsive manufacturing facility in Connecticut is supported by an extensive network of stocking distributors and factory sales offices located in virtually every part of the world. Special application assistance is always just a telephone call away.
The Ashcroft® ${ }^{-}$F-Series switch line of compact, adjustable pressure switches is designed to satisfy most requirements for alarm, shutdown, control and interlock on a wide variety of process and equipment
applications. Electromechanical pressure switches are usually more cost effective than transmitters for these applications. Materials of construction have been selected for long life. A wide variety of precision switch elements are available to meet every application requirement, including standard hermetically sealed contacts with added reliability and safety. The actuators we use have been proven in more than 20 years of service in the world's plants and mills. Simplicity and ease of use are stressed to improve reliability of the installation. F-Series is designed to easily retrofit many similar models and are readily available.

## Hermetically Sealed Switch

All Ashcroft F-Series models feature standard hermetically sealed switch contacts. We recommend hermetically sealed switch elements for improved reliability in harsh and corrosive environments. The Ashcroft F-Series is also approved for installation in Division I and II hazardous locations.

## F-Series Pressure Switches for Hazardous Locations

F-SERIES PRESSURE SWITCH MODEL NUMBER:
To specify the exact switch desired select entries from appropriate tables as shown in example below.

| 1 - FUNCTION |
| :--- |
| FPS - Pressure switch, single setpoint, fixed deadband |

| 2 - ENCLOSURE |  |  |
| :---: | :---: | :---: |
| N7 - NEMA 3, 4, 7 \& 9, IP66 Anodized aluminum for hazardous locations |  |  |
| 3 - SWITCH ELEMENTS FOR FPS CONTROLS |  |  |
| Code | S.P.D.T. Switch Elements UL/CSA Listed |  |
| P | Hermetically Sealed, Narrow Deadband | 5A, 125/250 Vac |
| J | Hermetically Sealed, General Purpose | 11A, 125/250 Vac 5A, 30 Vdc |
| L | Hermetically Sealed, Gold Contacts | 1A, 125 Vac |
| JJ | Dual Hermetically Sealed, General Purpose | 11A, 125/250 Vac $5 \mathrm{~A}, 30 \mathrm{Vdc}$ |
| LL | Dual Hermetically Sealed, Gold Contacts | 1A, 125 Vac |

| - ACTUATOR SEAL |  |  |
| :---: | :---: | :---: |
| Code | Material | Process <br> Temperature <br> Limits ${ }^{\circ}$ (1) |
| B | Buna N | $0-150$ |
| V | Viton | $20-200$ |
| T | Teflon | $0-150$ |
| R | Stainless Steel Diaphragm/ <br> Viton 0-ring | $0-150$ |
| S | 316 Stainless Steel Welded | $0-200$ |
| H | Stainless Steel Piston/ <br> Viton 0-ring | $20-200$ |

| $\mathbf{5} \boldsymbol{-}$ PRESSURE CONNECTION |  |
| :---: | :---: |
| Code | Description |
| 25 | $1 / 1 /$ NPT Female |
| 07 | $1 / 2$ NPT Female (Standard) |

| $\mathbf{6 -}$ F-SERIES OPTIONS |  |
| :--- | :--- |
| Code | Description |
| XFP | Fungus Proofing |
| XFS | Factory Adjusted Setpoint |
| XK3 | Terminal Blocks |
| XNH | Tagging Stainless Steel |
| X6B | Clean for Oxygen Service |

| 7A - NOMINAL RANGE AND PERFORMANCE TABLE - BUNA (CODE B) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |

| 400 | 28 | 1600 | 5.0-30.0 | 2.0-17.0 |
| 600 | 40 | 2400 | 8.0-48.0 | 4.0-34.0 |
| 1000 | 70 | 4000 | 10.0-80.0 | 5.0-55.0 |

All models feature $\pm 1$ percent of range setpoint repeatability and a minimum of 400 percent of range proof pressures. Setpoints are field adjustable between $15 \%$ and $100 \%$ of nominal range listed in Table. Exception: Stainless Steel welded(s), limits are 20\% and 100\%. $\dagger$ Vacuum range not available with stainless steel.
(1) Ambient operating temperature limits -20 to $150^{\circ} \mathrm{F}$, all styles, setpoint shift of $1 \%$ of range per $50^{\circ} \mathrm{F}$ temperature change is normal. Switches are calibrated at $70^{\circ} \mathrm{F}$ ambient reference.
