

Refrigerant Leak Detector

Tru Pointe®

Tru Pointe® Features & Benefits:

- Simple low cost refrigerant leak detector
- User-selectable low or high sensitivity mode
- Leak rate intensity with audible and visual indicators
- Long run time

The Bacharach Tru Pointe® refrigerant leak detector is a portable, battery powered instrument designed to pinpoint the location of refrigerant leaks in air conditioning and refrigerant systems, chillers or cold storage units.

Pinpoint Leaks Quickly!

With the use of heated-diode sensor technology, the Tru Pointe® instantly responds to all refrigerants. Automatic zero and background compensation allows the Tru Pointe® instrument to pinpoint a leak located in contaminated environments without the need for manual sensitivity adjustments.

HVAC service technicians, refrigerant service technicians, plant maintenance departments, automotive service facilities and refrigerant and environmental chamber manufacturers rely on this small, lightweight and rugged leak detector with its 14" flexible probe to locate small to large gas leaks in tight spaces such as those found in refrigeration units and automobile engine compartments.

Tru Pointe® Features & Benefits:

- Instantly responsive to all refrigerants
- Audible and visual alarms
- Innovative sensor replacement design
- Up to 20 hours continuous operation on 2 "D" size alkaline batteries
- High and Low sensitivity modes
- Automatic zero and background compensation
- Easy to use, one-handed operation
- No user calibration required

Tru Pointe® Specifications

Refrigerants Detected: All CFC, HCFC and HFC Refrigerants, Including

R12, R22, R123, R134A and blends of R404A, R408A, R409A and R410A (i.e. Any Refrigerant Containing Chlorine, Fluorine or Bromine Gas)

Detection Principle: Patented Heated Diode, Dispersive Electron,

Plug-in

Sensitivity: 0.5 oz/yr (14 g/yr) of R12 and R134a (per SAE J1627)

0.1 oz/yr (3 g/yr) of R12 (normal sensitivity mode) and R134a (high sensitivity mode) when probe tip is held at leak source for approximately 5 seconds

Sensitivity Adjustment: Automatic

Warm-Up Time: 10 Seconds

Response Time: Instantaneous

Dimensions: 2" W x 9.4" L x 2.5" D (5 cm x 23.8 cm x 6.3 cm)

Weight: 1.16 lb (0.53 kg) with Batteries

Alarm: Variable-intensity Audible and Visual Alarms

Probe: 14" (35.6 cm) Flexible

Operating

Temperature Range:

32° to 122° F (0 to 50° C)

Operating

Humidity Range:

10-90% RH, Non-Condensing

Power: 2 D Alkaline Batteries

Battery Life: 11 Hours Minimum in High Sensitivity Mode, Typical

20 Hours Minimum in Low Sensitivity Mode, Typical

Approvals: SAE J1627; CE Mark

Warranty: One Year, Including Sensor

Tru Pointe® Ordering Information

0019-8106

Tru Pointe® Refrigerant Leak Detector (instrument comes with batteries, instruction manual and hard carrying case)

0019-0501

Carrying Case

0019-0559

Replacement Refrigerant Sensor
