Focus redefined.

- Capture a clear, accurate image focused throughout the field of view with **MultiSharp™ Focus**. Simply point and shoot—the camera automatically processes a stack of images focused near and far (Ti450)
- Get an instant in-focus image of your designated target. **LaserSharp® Auto Focus**, exclusive to Fluke, uses a built-in laser distance meter that calculates and displays the distance from your designated target with pinpoint accuracy
- Get 4x the pixel data with **SuperResolution**, which captures multiple images and combines them to create a 640 x 480 image (Ti450)
- Save time–wirelessly sync images directly from your camera to the **Fluke Connect® system**, and attach to an asset record or work order. Having access to maintenance records simultaneously at the inspection site and from the office or an off-site location enables faster decision making and real time collaboration between team members
- **Get the context** of the visual and infrared details all in one precisely blended or picture-in-picture image with IR-Fusion® technology
- **See the details you need** with interchangeable smart lenses—2x and 4x telephoto and wide angle—no calibration required

100% Focused–Every object. Near and far. MultiSharp™ Focus.
