

Note:

Due to the atmospheric pressure's change, the barometer accuracy will be effected during the transportation, the barometer is not suitable to ship via airfreight.

If it has to be shipped by air, the diaphragm seal of gauge will be made under the non-working situation before packing. Before using, please use a screwdriver to adjust the re-set screw

(P/N ABAR300 : clockwise),

To calibrate the barometer according to a standard atmospheric pressure.
