TRMS Multimeter with Insulation Measurement

3-349-415-03
7/2.13

- **Insulation resistance measurement up to 3.1 GΩ**
with interference voltage detection,
test voltages: 50 V, 100 V, 250 V, 500 V, 1000 V
- **Multimeter with diverse functions** (V, Ω, F, Hz)
- **TRMS measurements:** TRMS AC / AC+DC for current/voltage up to 10 kHz
- Activatable **low-pass filter**, 1 kHz/-3 dB in the V AC range
- **Direct current measurement**, 100 nA to 10 A
- **Current measurement with clip-on current sensors – CLIP**
A transformation ratio of 1 mV:1 mA to 1 mV:1 A can be selected and is taken into consideration at the display.
- **Precision temperature indicator**, °C or °F, for Pt100/Pt1000 sensors and type K thermocouples
- **Diode measurement** ($I_K = 1 \text{ mA}$, U_{flow} to 5.1 V) and **continuity testing**
- **Display:** 4¾ place, 30000 digits, illumination can be activated
- **Acoustic signals** for: continuity testing, dangerous contact voltages, exceeded overload limits
- **Min-Max value storage**
- **Data memory** and internal clock, power pack adapter socket
- IP 54 **Housing** protection, dust and splash protected, protective cover
- **Bidirectional infrared interface** for exchanging data with a PC
- **Windows software** available as accessory for processing and graphic display of measured values via USB interface

Application

The METRAHIT | Iso multimeter is a rugged portable measuring instrument. It is suitable for servicing household appliance, machines (e.g. forklifts) and systems (e.g. photovoltaic). The instrument can be used in the field and is equipped with an internal, mains-independent power supply.

Features

RMS Value with Distorted Waveshape

The utilized measuring method allows for waveshape independent TRMS measurement of periodic quantities (AC) and pulsating quantities (AC and DC) for voltage and current at up to 10 kHz.

Activatable Filter for V AC Measurement

A 1 kHz low-pass filter can be activated if required, e.g. for measurements at cables with parasitic external signals. The input signal is checked by a voltage comparator for dangerous voltages as long as the low-pass filter is activated, which are indicated at the display if present.

Diode Testing with Constant Current $I_C = 1 \text{ mA}$

This function can be used to test the polarity of diodes, and to test electrical circuits for short-circuiting and interruptions. The test voltage source makes it possible to measure LEDs and reference diodes up to 5.1 V, e.g. also white LEDs.

Fast Acoustic Continuity Test $I_K = 1 \text{ mA}$

Testing for short-circuiting and interruption is possible with the selector switch in the Ω) position. The threshold value for acoustic signaling can be set to 1, 10, 20, 30, 40 or 90 Ω.

Insulation Resistance Measurement with Interference Voltage Detection

Depending upon the utilized instrument variant, insulation resistance can be measured with an adjustable test voltage of 50 to 1000 V.

If the instrument detects interference voltage of greater than 15 V AC or 25 V DC during insulation testing, an error message is briefly displayed at the LCD panel. The instrument is then automatically switched to voltage measurement TRMS (AC + DC) with an input resistance of approximately 1 MΩ and the currently measured voltage value is displayed.

Analog Scale for Quick Trend Display – Pointer

The analog scale (with additional negative axis range for zero-frequency quantities) allows for faster recognition of measured value fluctuation than is possible with a digital display.

Automatic/Manual Measuring Range Selection

Measured quantities are selected with the rotary switch. The measuring range can be automatically matched to the measured value, or selected manually.

High Resolution Mode

Via mem function „Set Resol“, the multimeter (in V DC and Ohm-function) can be switched to a high-resolution operating mode with 30,000 digits and enhanced accuracy.

TRMS Multimeter with Insulation Measurement

Automatic Storage of Measured Values

The DATA HOLD function automates the storage of measured values after they have settled in. A patented process assures that random values are not saved to memory in the case of rapidly changing measured quantities, but rather the actual measured value. The stored measured value appears at the digital display. The analog display continues to read out the current measured value.

Overload Protection

Overload protection safeguards the instrument in all measuring functions against voltage of up to 1000 V. Voltages of greater than 1000 V and currents of greater than 10 A are indicated acoustically. FUSE appears at the display if the fuse for the current measuring input blows.

IEC 61010-1, 2nd Issue

Multimeters manufactured as of 1 January 2004 may not be the source of any possible hazard, regardless of the utilized combination of input voltages, function settings and range selections. Possible hazards include electrical shock, fire, sparking and explosion.

Battery Charging Status – Power Saving Circuit

The battery charging status is indicated by means of four symbols. The device is switched off automatically if the measured value remains unchanged for a period of between 10 and 59 minutes (adjustable), and if none of the controls are activated during this time. Automatic shutdown can be deactivated by switching the instrument to continuous operation.

Three Connector Jacks with Automatic Blocking Sockets (ABS) *

All current ranges are implemented via a single connector jack which prevents any possibility of operator error. Beyond this, the automatic blocking sockets prevent incorrect connection of the measurement cables, as well as selection of the wrong measured quantity. Danger to the user, the instrument and the device under test resulting from operator error is thus ruled out.

* Patented (patent no. DE 40 27 801 C2 and US 5,166,599)

Housing and Protective Cover for Harsh Conditions

- New housing design
- Separate battery and fuse compartments
- Intelligent key functions with SMD button

The instrument is protected against damage in the event of impacts or dropping by means of a soft rubber cover with tilt stand and test probe holder. The rubber material also assures that the instrument does not wander if it is set up on a vibrating surface.

Infrared Data Interface

The device can be remote configured, and momentary and saved measurement data can be read out via the bidirectional infrared interface. The USB | X-TRA interface adapter and METRAWIN 10 software are required to this end (see accessories). Interface protocol and device driver software for LabVIEW® (National Instruments™) are available upon request.

Voluntary Manufacturer's Guarantee

36 months for materials and workmanship
1 to 3 years for calibration (depending upon application)

DAkkS calibration certificate

METRAHIT | Iso cable multimeters are furnished with an internationally valid DAkkS calibration certificate (recognized by EA and ILAC).

In addition to standard quantities, our DAkkS calibration lab is also accredited for high value ohmic resistance of up to 30 GΩ / 1000 V.

After the specified calibration interval has elapsed (recommended interval: 1 to 3 years), the multimeters can be inexpensively recalibrated at our own DAkkS calibration center.

Insulation multimeter See selection list or scope of delivery on page 2 for scope of delivery.	METRAHIT Iso	M246B
Power pack: 90 ... 250 V AC / 5 V DC, 600 V CAT IV	NAX-TRA	Z218G
Accessory Cables and Adapters		
Cable set (1 pair of measurement cables), 1.2 m, with VDE-GS mark 600 V CAT IV 1 A ¹⁾ , 1000 V CAT III 1 A ¹⁾ 1000 V CAT II 16 A ²⁾	KS17-2	GTY3620034P0002
Cable set with 2 mm Ø steel tips with cable length 120 cm, 1000 V/CAT II	KS17-S	Z110H
Cable set incl. test probes, clips and USA test probes, (1000 V CAT II / III 20 A)	KS-NTS	Z110W
Cable set for telecommunication application (a-b-E) 1000 V CAT III 1 A ¹⁾	KS21-T	Z110U
Alligator clips (1 pair) for KS17-2 1000 V CAT III 16 A	KY95-3	Z110J
Clip-on current sensor, 10 mA ... 100 A, 1 mV / 10 mA, clip opening: 15 mm dia.	WZ12B	Z219B
Accessories for Operation at a PC		
Bidirectional interface adapter, IR-USB	USBX-TRA	Z216C
METRAwin 10 software	METRAwin 10	GTZ3240000R0001
Accessories for Temperature Measurement with Resistance Thermometer		
Pt100 temperature sensor for surface and emersion measurements, -40 ... +600 °C	Z3409	GTZ3409000R0001
Pt1000 temperature sensor for measurement in gases and liquids, -50 ... +220 °C (for servicing household appliances)	TF220	Z102A
Pt100 oven sensor, -50 ... +550 °C	TF550	GTZ3408000R0001
Ten adhesive Pt100 temperature sensors, -50 ... +550 °C	TS Chipset	GTZ3406000R0001
Protection and Transport Accessories		
Imitation leather carrying pouch	F829	GTZ3301000R0003
Cordura belt pouch	HitBag	Z115A
Ever-ready case for 2 instruments and accessories	F840	GTZ3302001R0001
Hard case for one instrument and accessories	HC20	Z113A
Hard case for two instruments and accessories	HC30	Z113A
Replacement Fuses		
Fuses (pack of 10)	FF 10 A/ 1000 V AC/DC	Z109L
