EL-GFX

Quick Start Guide

---

① **Welcome! Let's set up your EL-GFX**
First Install Your Software & USB Driver
Windows ™ 7, 8.1 and 10

- Visit www.lascarelectronics.com/software/easylog-usb and click "Download"

② **Install Your Battery**

- Your EL-GFX data logger is supplied with batteries fitted. To connect the batteries pull and remove the plastic tag located at the join between the top and bottom housing. With this removed tighten the screws to ensure a waterproof seal between housings.

- When replacing batteries, loosen the two screws located at the base of the unit. Remove the lower portion of the housing to expose the battery bay. Remove the old batteries and place new batteries in position. Replace the lower housing and tighten the screws.

③ **Your Data Logger Is Ready For Use**

Ensure the batteries are correctly installed.

- Connect the data logger to an available USB port on your PC using the micro USB cable provided.

- Double click on the EasyLog USB icon on your Windows™ desktop. This will load the configuration software. Set-up the data logger for a new log, download a data logger that has been recording, view previously saved data in graph format and check the current status of the attached data logger (including the serial number).

EasyLog USB

- When setup is complete, the data logger should be disconnected from the USB port to begin recording. If you would like advice on how best to use the data logger for a particular application, please contact your nearest Lascar representative.

- **Do not leave your data logger connected to the USB port as this will cause some of the battery capacity to be lost.**
