Technical Data Sheet
AMIK 300 / 301

c(UL)us

LISTED

File No. E471457

AMIK 300 is a compact multifunction instrument with touch screen LCD utility which measures important electrical parameters in 3 phase and single phase System & replaces the need of multiple analog panel meters.

Special Features

- → True RMS Measurement
- → Onsite Programmable
- → Low Back Depth
- → Phase Reversal Indication
- → Touch screen graphics LCD
- → RS-485 MODBUS & 4-20 mA analog output, included on Model 301.

Application

AMIK 300 measures important electrical parameters in 3 phase and single phase System & replaces the need of multiple analog panel meters. It measures electrical parameters like AC current, Voltage, frequency, active energy import & active energy export, Current Demand, kW Demand, kVA Demand and Max Current Demand, Max kW Demand and Max kVA Demand.

Product Features

Touch screen graphics LCD	AMIK 300 has touch sensible color graphics LCD display with resolution of 320 x 240.	**Phaser Diagram**	Pictorial representation of all 3 Phases (Voltage & Current) in terms of vectors.
On site programmable PT/CT ratios	It is possible to program primary of external Potential Transformer (PT), primary of external Current Transformer (CT) on site locally by entering into Programming mode or remotely via MODBUS (RS-485)	**Wave Form**	Pictorial representation of all 3 phases Current & voltage in terms of sinusoidal waveform.
		Total Harmonic Distortion (THD)	The instrument can measures per phase (%) THD of voltage and (%) THD of current.
User selectable CT Secondary 5A/1A	The secondary of external Current Transformer (CT) can be programmed on site to either 5A or 1A locally by entering into Programming mode or remotely via MODBUS (RS-485)	**Energy Count storage**	In case of power failure, the instrument memorizes the last energy count. Every 40 sec, the instrument updates the energy counter in the nonvolatile memory.
User selectable PT Secondary	The secondary of external Potential Transformer (PT) can be programmed on site locally by entering into Programming mode or remotely via MODBUS (RS-485)	**Programmable Energy format & Energy rollover count**	Customer can assign the format for energy display on MODBUS (RS-485) in terms of W, kW or MW. Additional to this, customer can also set a rollover count from 7 to 14 digits depending on the energy format.
User selectable 3 phase 3W or 4W unbalanced system	User can program on site the system connection as either 3 Phase 3 Wire or 4 Wire locally by entering into Programming mode or remotely via MODBUS (RS-485). For single phase applications, single phase version is available.	**Hour Run, ON Hour, Number of Interruptions**	Hour run records the number of hours load is connected. ON Hour is the period for which the auxiliary supply is ON. Number of Interruptions indicates the number of times the Auxiliary Supply was interrupted.
Low back depth	The instrument has very low back depth (behind the panel) of less than 80 mm in spite of optional features like pulse output	**Optional MODBUS (RS485) Output**	The optional ModBus output enables the instrument to transmit all the measured parameters over standard MODBUS (RS-485).
Onsite selection of Auto scroll / Fixed Screen	User can set the display in auto scrolling mode or fixed screen mode can be programmed locally by entering into Programming mode or remotely via MODBUS (RS485).	**User Assignable Registers for MODBUS**	Customer can assign MODBUS register address as per his need for faster response time.
Phase reversal indication	The instrument can detect wrong phase sequence or failure of one of the input voltages and displays "phase" error message.		
Energy measurement (Import and Export)	Active energy (kWh), Reactive energy (kVArh), Apparent energy (kVAh) & Ampere Hour (kAh). Any of the parameters can be freely assigned to 2 optional pulse outputs.		
True RMS measurement	The instrument measures distorted waveform up to 15th Harmonic.	**Configuration of the Instrument via MODBUS**	The instrument settings can be configured locally by entering into Programming mode or remotely via MODBUS (RS485) **Note:** The MODBUS communication parameters can only be set locally by entering into the Programming mode.
User selectable Low Current suppression (below 30 mA)	User can suppress the readings below 30 mA in the current measurement by onsite programming if required.		

Product Features

|			
Min Max storage of parameters possible	The instrument stores minimum and maximum values for System Voltage and System Current. Every 40 sec minimum and maximum readings are updated.	**Optional Analog Outputs (1 or 2 Outputs)**	1 or 2 Analog outputs can be programmed from a list of input parameters.
Number of parameters measured : more than 46	The instrument measures more than 46 electrical parameters of 3 Phase network.	**Enclosure Protection for dust and water**	conforms to IP 54 (front face) as per IEC60529
Parameter Screen recall	In case of power failure, the instrument memorizes the last displayed screen. The displayed screen will get memorized only if user keeps this screen for minimum 40 sec duration before power failure for fixed screen mode.	**Compliance to International Safety standards**	Compliance to International Safety standard IEC 61010-1- 2001
		EMC Compatibility	Compliance to International standard IEC 61326

Technical Specifications

Reference conditions for Accuracy

Reference temperature	23°C +/- 2°C
Input waveform	Sinusoidal (distortion factor 0.005)
Input frequency	50 or 60 Hz ±2%
Auxiliary supply voltage	Rated Value ±1%
Auxiliary supply frequency	Rated Value ±1%
Voltage Range	50... 100% of Nominal Value. 60... 100% of Nominal Value for THD.
Current Range	10... 100% of Nominal Value. 20... 100% of Nominal Value for THD.
Power	Cos phi / sin phi = 1 for Active / Reactive Power & Energy. 10... 100% of Nominal Current & 50... 100% of Nominal Voltage.
Power Factor / Phase Angle	40... 100% of Nominal Current & 50... 100% of Nominal Voltage.

Accuracy

Voltage	± 0.5% of range
Current	± 0.5%of range
Frequency	± 0.15% of mid frequency
Active Power	± 0.5% of range
Re-Active Power	± 0.5% of range
Apparent Power	± 0.5% of range
Active energy (kWh)	± 0.5% of range
Re Active energy (kVArh)	± 0.5% of range
Apparent energy (kVAh)	± 0.5% of range
Accuracy of Analog Output	1 % of Output end value
Power Factor	±1% of Unity
Angle	±1% of range
Total Harmonic Distortion	±1%

Electrical Connections

For 3 Phase 4 Wire Unbalanced Load

For 3 Phase 3 Wire Unbalanced Load

For Single Phase
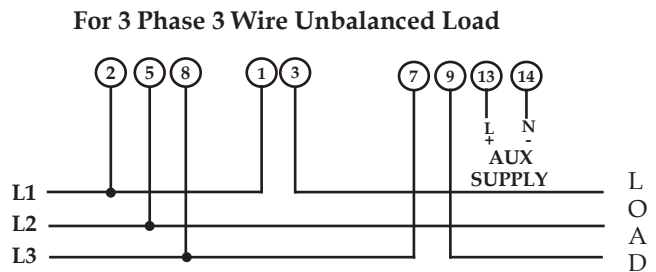

It is recommended that the wires used for connections to the instrument should have lugs soldered at the end. That is, the connections should be made with Lugged wires for secure connections. The Maximum diameter of the lug should be 7.0 mm and maximum thickness 3.5 mm. Permissible cross section of the connection wires: <= 4.0 mm² single wire or 2 × 2.5 mm² fine wire.

Technical Specifications

Input Voltage

Nominal input voltage (AC RMS)	Phase –Neutral 63.5 / 133 / 239.6 / 254 VL-N Line-Line 110/230/415/ 440 VL-L
System PT primary values	100VLL to 692kVLL programmable on site.
Max continuous input voltage	120% of rated value

Input Current

Nominal input current	5A AC RMS.
System CT secondary values	1A & 5A programmable on site.
System CT primary values	From 1A up to 9999A (for 1 or 5 Amp)
Max continuous input current	120% of rated value

Auxiliary Supply

AC/DC Auxiliary Supply	100V… 250 VAC DC +/- 10%
DC Auxiliary Supply	12…..48 VDC +/- 10%
AC Auxiliary supply frequency range	45 to 66 Hz

Overload Withstand

Voltage	2 x rated value for 1 second, repeated 10 times at 10 second intervals
Current	20x rated value for 1 second, repeated 5 times at 5 min

Operating Measuring Ranges

Voltage	5… 120% of rated value
Current	5 … 120% of rated value
Frequency	40…70 Hz
Power Factor	0.5 Lag ... 1... 0.8 Lead

Influence of Variations

|	
Temperature coefficient	0.025%/°C for Voltage (50... 120% of rated value) and 0.05%/°C for Current (10... 120% of rated value)

Environmental

Operating temperature	-20 to +70°C
Storage temperature	-30 to +80°C
Relative humidity	0... 95% non condensing
Warm up time	Minimum 3 minute
Shock	15g in 3 planes
Vibration	10... 55 Hz, 0.15mm amplitude

Dimensions

96 mm

96 mm

Display Area

80 mm

92mm+0.8

92mm+0.8
Panel Cutout

Technical Specifications

Display update rate

Response time to step input	1 sec approx.

Applicable Standards

EMC	IEC 61326
Immunity	IEC 61000-4-3. 10V/m min – Level 3 industrial low level
Safety	IEC 61010-1-2001 , Permanently connected use
IP for water & dust	IEC60529
Pollution degree	2
Installation category	III
High Voltage Test	2.2 kV AC, 50Hz for 1 minute between all electrical circuits

VA Burden

Nominal input voltage burden	< 0.2 VA approx. per phase
Nominal input current burden	< 0.6 VA approx. per phase
Auxillary Supply burden For VAC Aux.	< 6.5 VA approx.
For DC Aux.	< 3 W approx.

PT Secondary Ranges for Various Input Voltage

Input Voltage	PT Secondary Settable Range
110V L-L (63.5V L-N)	100V – 120V L-L (57V – 69V L-N)
230V L-L (133V L-N)	121V – 239V L-L (70V – 139V L-N)
415V L-L (239.6V L-N)	240V – 480V L-L (140V – 277V L-N)

Ampere Hour

Default pulse rate divisor	CT secondary = 1A Max pulse rate 3600 pulses/Ah *
	CT secondary = 5A Max pulse rate 720 pulses/Ah
Other Pulse rate **Divisors (applicable only when Energy on MODBUS (RS-485) is in W)**	
10	CT secondary = 1A Max pulse rate 3600 pulses/10Ah *
	CT secondary = 5A Max pulse rate 720 pulses/10Ah
100	CT secondary = 1A Max pulse rate 3600 pulses/100Ah *
	CT secondary = 5A Max pulse rate 720 pulses/100Ah
1000	CT secondary = 1A Max pulse rate 3600 pulses/1000Ah * CT secondary = 5A Max pulse rate 720 pulses/1000Ah
Pulse duration	60 ms, 100 ms or 200 ms

*No. of Pulses = $\dfrac{\text{Maximum Pulses}}{\text{CT Ratio}}$

Where, CT Ratio = (CT primary/ CT Secondary)

Accessories – Three-Phase Current Transformer

A three-phase terminal style current transformer can be used with A M I K three phase meters. Other CT'S available

The current transformer is equipped with terminals to permit easy connection to the AMIK units.

These terminals are #8-32 brass studs and come with a flatwasher, lockwasher and a regular nut (leads are not provided).
